

# OPERATING PRINCIPALS

## NO RESEARCH FOR THE SAKE OF RESEARCH

Any and all research that is conducted within our walls must be useful and have a well-defined end user. We work with various stakeholders to identify the real issues happening in the forest and turn them into applied research projects. In a nutshell the NHRI was created to bring immediate, applicable and field-tested solutions for foresters, contractors, woodlot owners and forest workers with boots on the ground and eyes on the canopy. For our team this means that any and all research and field work must be focused exclusively on that end.
