

# FINANCIAL PARTNERS

## MULTI-STAKEHOLDER NETWORK.

The Northern Hardwoods Research Institute results from an innovative partnership between forest companies operating in New Brunswick, UMCE, the Atlantic Canada Opportunities Agency (ACOA) and the New Brunswick government.

NHRI has been a multi-stakeholder network since its' inception and has gained precious experience in managing cooperative relationships between academia, business and government. We work with various stakeholders to identify important issues happening in the forest. We then convert these forestry issues and questions into applied research projects in order to identify and implement field-tested solutions for foresters, contractors, woodlot owners and forest workers with boots on the ground and eyes on the canopy. Our research is built around finding solutions for forestry professionals. Finding solutions to hardwood and mixed forest management issues is at the core of everything we do.
